WELL INVESTIGATION PROGRAM—SUPPLEMENTAL SUBSURFACE INVESTIGATIONS
AT 1200 S. FLOWER ST., BURBANK, CA., (FILE NO. 109.0582)

Reference is made to your consultant's, Environ, telecopier transmittal dated April 24, 1995, containing information on the proposed site assessment activities to be conducted at the subject site. Your consultant proposes to conduct short term aquifer tests on six well locations, two wells in the perched zone, two wells in the "A" zone and two wells in the "B" zone, to develop preliminary estimates of aquifer hydraulic conductivity in these zones underlying the site. We have reviewed the proposal and information obtained up to date and have no objection to its implementation provided that all work is completed as proposed.

Subsequent to completion of the field activities, three copies of a technical report containing the results of the aquifer tests must be submitted to this Regional Board.

If you have any questions, please contact Ms. Ana Veloz at (213) 266-7590.

GREGG KWEY
Senior Water Resource
Control Engineer
